

Windows Azure

Windows Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale and manage applications across a global network of Microsoft datacenters. You can build applications using multiple languages, tools and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight web sites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for back up, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted in Windows Azure. Scale instantly as your install base grows.

MEDIA

Create, manage and distribute media in the cloud - everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Windows Azure provides a rich set of application services, including SDKs, caching, messaging and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic OS and service patching, built in network load balancing and geo-redundant storage. Windows Azure also proudly deliver a 99.95% monthly SLA. You can rely on decades of experience in datacenter operations and trust that everything Windows Azure offers is backed by industry certifications for security and compliance.

DATACENTER WITHOUT BOUNDARIES

Windows Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Windows Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Windows Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with System Center.

GLOBAL REACH

With datacenters around the globe, a massive investment in datacenter innovation and a worldwide Content Delivery Network, you can build applications that provide the best experience for your users wherever they are.

Cloud- and Browser-Based Enterprise Resource Planning Solution for Midsize Businesses

COMPANY PROFILE

Founded in 2007 and headquartered in Kirkland, Washington, Acumatica has a mission to enable midsize businesses to be more competitive as the market landscape changes. It accomplishes this by providing customers with easy-to-use, cloud-based enterprise resource planning (ERP) tools that deliver desktop-like performance from the browser. Acumatica ERP includes fully integrated product suites for Financial Management, Distribution Management, Customer Management, and Project Accounting. Released in 2013, Acumatica 4.0 is the fastest and most powerful Acumatica release to date. It works across desktop, tablet, and smartphone devices, and has been optimized for touch screens. The “Expense it for Acumatica” Windows 8 app lets users quickly and easily submit, edit, and review expense claims in Acumatica.

WHAT WE OFFER

Many ways to the cloud.

With Acumatica, customers can lower costs, maintain security, and work anywhere with real-time data on any device. They can choose public or private cloud, and get the best of the cloud without the drawbacks either way.

Many ways to deploy.

Customers can choose deployment options ranging from software-as-a-service, hosted, or on-premises—and switch between public or private cloud options easily as business needs change. It's the same powerful ERP solution

Powered by

Windows Azure

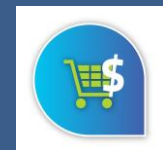

Many ways to use.

Acumatica delivers a completely browser-based experience with the power of desktop-like performance that's optimized for any device and integrates easily with other applications.

Many ways to buy.

Unlimited user pricing means customers can add users at no additional cost. They can get Acumatica as a subscription or buy the license, or switch between the two. There are no hidden costs.

WHAT OUR CUSTOMERS ARE SAYING

“With Acumatica, we saved more than \$50,000 worth of IT work hours, hardware investments, and licensing costs, while extending our accounting system to manage our workflow processes.” – Jeffrey Lim, IT Manager, KFC Singapore
